GUTECH · TIMETABLE APP

SCHEDULE.TRYZARQA.COM

Classy.

Every GUtech student's real timetable, class by class and date by date. Set up in a minute, right on any phone.

FOR STUDENTS

Your week, sorted.

Classy knows GUtech's timetable changes from week to week, so every class keeps its own date, time and room.

SIGN IN

Your student ID. No password.

Type your ID and enter the 6-digit code sent to your GUtech email. You stay signed in.

SETUP

Set up in a minute

Pick your major and year, and your core courses are already ticked. Add life skills and electives, then choose your sections.

TODAY

What's on right now

The class you're in with the minutes left, a countdown to the next one, and the whole of tomorrow on free days.

WEEK AND DAY

Numbered teaching weeks

Move through Week 1, Week 2 and on. Every class sits on its real date, and long classes show their full length.

CHANGES

Know when a class moves

A "Changed" badge appears when a class gets a new time, room or teacher, until you've seen it.

CLASHES

Shown, never blocked

Overlapping classes are flagged so nothing is hidden, and students with a clash waiver can still keep both.

YOUR OWN SLOTS

Gym, study, meetings

Add your own events, every week or on one date, and see them beside your classes.

CLASS NOTES

Private, or shared

Note a class or one class date. Keep it to yourself or share it with classmates, who can report anything wrong.

COLOURS

Make it yours

Pick a colour theme, or choose your own main colour, accent and background.

FLEXIBLE

Change your year any time

Postponed a year or picked the wrong one? Switch it from the menu and your core courses follow.

COMING WITH GUTECH

"Get my courses from GUtech"

Once GUtech connects its system, one press fills in each student's real courses and sections. Classy is already built for it.

WITH FRIENDS

Better together.

Share your week in a tap, find when your friends are all free, and plan the ride to uni around everyone's classes.

SHARE

Your week as a picture

One tap on Share turns your week or day into a picture in your own colours, sized for chats or for stories, and opens WhatsApp, Instagram or any app. No student ID in it.

FREE TOGETHER

When is everyone free?

Make a group and send the link. Classy shows the times this week when you're all free, and when everyone but one or two is.

RIDE TOGETHER

Plan the car

For people who drive to uni together: when to leave home, when to leave uni, who isn't coming, and who waits how long each day.

WEEK BY WEEK

Always this week's times

Free times and rides use everyone's real dated classes, so they follow GUtech's week-to-week changes.

LONG WAITS

A second ride, suggested

If someone would wait more than three hours after their last class, Classy suggests an earlier ride home for them.

PRIVATE BY DEFAULT

Friends see free or busy, not your timetable

People join only by invite and see each other by a chosen name, never a student ID. Showing your classes is your choice, your own slots always stay private, and you can leave any group at any time.

FOR STAFF

Easy to keep right.

A dashboard for RSA and owners to keep the timetable accurate and see how Classy is used, without technical skills.

TIMETABLE UPDATES

Every change previewed before students see it

New timetables come in from three places, and all of them go through the same safe steps.

EXCEL OR CSV UPLOAD · EDUWAVE SYNC · ANY CONNECTED API → PREVIEW → APPLY → STUDENTS

AUTOMATIC SYNC

EduWave, every morning

The Classy Sync extension reads the timetable from EduWave in the background and picks up where it stopped if signed out.

CONNECTIONS

Plug in any API

Point Classy at a JSON API and say which field is which. No code changes; a Test button shows the result first.

FIX A CLASS

Edit in seconds

Correct a section's teacher, time or room, or add a class. Its students see the change straight away.

DEFAULTS

The right courses, pre-ticked

Set default courses for each major, family of majors and study year, by drag and drop.

SEMESTERS

Weeks that match the calendar

Create, publish and remove semesters, and set when Week 1 starts and the last teaching week.

MODERATION

Every public note in one place

See all shared notes, with reported ones flagged, and hide or delete them in one click.

FEEDBACK

"Rate Classy" in one press

Send students a rating question and read the stars and anonymous comments as they come in.

DASHBOARD

Live at a glance

Students active now and today, setup progress, recent uploads, and what needs attention.

ROLES

RSA and owners

RSA keep the timetable right. Owners also manage staff accounts and individual students. New staff set their own password first.

TRUST AND SAFETY

Built to be trusted.

Classy keeps only what a timetable needs, guards every change, and is tested before every update.

PRIVACY FIRST

Only what a timetable needs

University ID, student email, major, year and course picks. No names, no tracking or ads.

STAFF SEE COUNTS

Not people

RSA accounts never see student IDs, and feedback is anonymous. Only owners can see individual students.

SECURE SIGN-IN

Codes, not passwords

Sign-in codes expire in 10 minutes and are stored hashed. Tries are limited, and staff accounts lock after repeated wrong passwords.

EDUWAVE

No EduWave passwords

Classy never stores an EduWave password, and its server never signs in to EduWave.

SAFE UPDATES

Nothing changes by surprise

Every timetable change is previewed first, and a feed that would wipe most courses is refused.

BACKUPS

Before every update

The database is backed up before each update, and the latest 14 copies are kept.

QUALITY

133 automated tests

Every update must pass them all before it goes live, so new features don't break old ones.

READY FOR GUTECH

Open to official data

Today Classy reads EduWave. It is ready to take GUtech's official timetable and enrollment data the day it's offered.
